

PRESS RELEASE 2022 – WEEK 12

To “Parma” on your bicycle? Not a problem with Rameder! Bikes are safe and secure on the family-friendly carrier

Why not change things up from your usual walks? On a bicycle, you can expand your action radius for your next day out or weekend trip. And you don't always have to set out from your own front door, either. Because Rameder, Europe's largest supplier of transport solutions for passenger car, offers a variety of different carrier systems in its own online shop. The family-friendly and particularly affordable Parma bike carrier is the latest product to be added at www.rameder.eu.

As the name [Parma 3](#) indicates, it can hold up to three bicycles. The convenient quick-release attachment system allows the carrier with a maximum payload of 60 kilograms to be mounted on the towbar quickly and easily. Its ratchet straps and the adjustable tire holders ensure that the bicycles remain safely attached during the trip, including when transporting bicycles in different sizes – which is of course quite common for family outings.

The fold-down mechanism is particularly useful: It makes it easy to access the trunk even while the bicycles are attached. The Parma 3 bike carrier is now available from the online shop www.rameder.eu for the great price of only 268 euros. The [Parma 4](#) carrier is technically identical, but designed to hold four bicycles. This model is now only 280 euros at **Rameder**. Both carriers are equipped with a 13-pin connector.

Clever cyclists additionally protect their bicycles on the carrier with the [transport protector](#). It is available from the **Rameder** online shop for only 33 euros. Its soft padding distributes the pressure from the bike carrier mounts across a large area to protect the bicycles against scratching. The transport protector is suitable for all types of frame designs and can be attached easily with hook-and-loop closures.
